

Alumni Mentorship & Mock Interview Platform (Problem Statement #06)

Deliverable 1: Complete Requirements Specification Table (5 Functional & 2 Non-Functional Requirements)

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale	Comments
FR-001	Functional	The system needs to suggest mentors based on the student's selected field (like AI or Cloud). It should let students book a session directly.	High	Pass: Meeting link is generated and added to both calendars. Fail: The slot gets double-booked or the domains don't match.	Students need an easy way to find and book mentors in their specific area of interest.	Core problem statement requirement.
FR-002	Functional	Alumni should be able to update their profiles, set their expertise areas, and add available timeslots for interviews.	High	Pass: Open slots show up for students to see right away. Fail: Mentors create overlapping timeslots.	Mentors need control over when they are free to take interviews.	Must handle time zones correctly.
FR-003	Functional	Mentors will use a standard scorecard to rate the student (technical, communication, problem-solving) and leave written feedback.	High	Pass: The completed scorecard shows up on the student's dashboard. Fail: A mentor tries to submit without filling all required ratings.	Gives students clear, consistent feedback they can actually use to improve.	Ratings will be on a 1-5 scale.
FR-004	Functional		Medium			

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale	Comments
		Students can attach their resume (PDF/ DOCX) and write down what they want to focus on when they book a session.		Pass: The file uploads successfully and the mentor can view it. Fail: The file is too large (>5MB) or in the wrong format.	Mentors need to see the student's background before the interview starts.	Need basic file size limits.
FR-005	Functional	The system tracks how many interviews a student does and shows a chart of their scorecard ratings over time. It also gives badges to active mentors.	Medium	Pass: Students can see a graph of their progress. Mentors get badges. Fail: The scores in the chart don't match the individual scorecards.	Helps students track their improvement and keeps mentors motivated to stay on the platform.	Can be done in later phases.
NFR-001	Non-Functional	All user data, resumes, and scorecards must follow privacy rules. If someone deletes their account, their data should be soft-deleted within 24 hours.	High	Pass: Data is soft-deleted and hidden within the 24-hour limit. Fail: User details are still visible after 24 hours.	To protect student and mentor privacy.	College data privacy policy requirement.
NFR-002	Non-Functional	The calendar scheduling feature has to be highly available (99.9%) and handle simultaneous bookings without	High	Pass: Two people trying to book the exact same slot at the exact same time don't get double-booked.	Scheduling needs to be reliable so people don't miss interviews.	Will need concurrency testing.

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale	Comments
		crashing or double-booking.		Fail: The system allows a double booking.
